## **BACKGROUND AND LEGISLATION**

### BACKGROUND

Supervision is essential in ensuring that children's safety is protected in the service environment. Children have a right to be protected from potential hazards and dangers posed by products, plants, objects, animals and people in the immediate and wider environment.

Supervision is an integral part of the care and education of children and requires staff members to make ongoing assessments of the child and the activities in which they are engaged; utilising a range of skills such as positioning and peripheral vision. Active supervision assists in the development of positive relationships between educators, children and their families, and informs ongoing assessment and future planning. Adequate supervision (*refer to Definitions*) requires teamwork and good communication between educators.
